To: All Hospital Administrators

Why choose ACE for Cardiac Catheterization Laboratory Accreditation?

ACE is the most experienced Cath Lab accreditation organization:

- Comprehensive programs for all catheter based therapies:
 - Interventional cardiology (Cath/PCI)
 - Carotid stenting (CAS)
 - Peripheral vascular interventions (PVI)
 - Electrophysiology (EP)
 - Congenital heart and pediatrics (CHD)
- A unique database of >6000 Angiographic Case Reviews benchmarks your lab to high performing labs
- A team of seasoned clinicians dedicated to Quality Improvement in the Cardiac Cath Lab

Hospital administrators want to know: What are the benefits of ACE accreditation to the hospital and ROI?

While there are many reasons to invest in ACE Accreditation, the most important is that accreditation builds a quality "asset" and reduces cost.

Quality

- A proactive, hospital-friendly validation of organization quality using ACE clinician quality review experts.
- A tested and successful process to validate appropriate patient selection by clinicians.
- Detailed reports from the site visit and angiographic review, to identify opportunities and a blueprint for improvement.
 - Proven resources and tools to assist with the corrective action plan.
 - A focus on improved documentation and structured reporting.
- An enhanced facility reputation for high quality and best practices.

Cost Reduction - ACE clients tell us:

- Improved documentation increases revenue by reducing denials and providing a foundation for more accurate coding.
- Accreditation lowers cost by reducing unnecessary variability and standardizing practices.
- Accreditation creates positive recognition from payers and engagement of your physicians.
